

Program Management Support Services

Federal Aviation Administration

For over a decade, AMTI has supported the FAA's Global Navigation Satellite Systems (GNSS) Program Office to develop, integrate, implement, commission and sustain the FAA's Wide Area Augmentation System (WAAS) and to support the research and development of the Local Area Augmentation System (LAAS). Support tasks include project management, earned value management (EVM) and OMB-300 preparation, as well as human systems and software engineering, safety assurance, facilities and contract management and financial planning. With AMTI's support, WAAS has achieved integrated Capability Maturity Model (iCMM) Level 3 in the areas of information management, configuration management, quality assurance, and risk management and currently operates its training and measurement and analysis process areas at FAA-iCMM Capability Level 3.

United States Air Force

AMTI provides the United States Air Force Materiel Command with a full range of weapon systems acquisition management support including highly skilled engineering and functional support activities at Wright Patterson Air Force Base in Dayton, Ohio. Key functional areas of support include test and evaluation, financial management, logistics, contracting, configuration management, program management, and training systems management.

Customer-Focused Program Management

Successfully managing a multi-million dollar Federal program requires experience, skill, and quality support. Advanced Management Technology Inc. (AMTI) gives agency program managers a complete set of management support services that meet the unique needs of their agency – allowing them to focus on key goals and objectives while knowing that every aspect of program execution is carried out with careful attention to detail.

Complete Set of Program Management Support Services

Managing the complexities of a major Federal program is an AMTI core competency. Working collaboratively with our Federal partners, we bring the people, technical expertise, capabilities and resources required to successfully support their goals at any point in the program life cycle. Core services we provide include:

- Program Management Office (PMO) office support
- Earned Value Management (EVM) implementation and reviews
- Complete acquisition support
- System life-cycle planning and documentation
- Program strategy and project compliance reviews

Our Proven Processes and Tools Ensure Program Success

Successful Federal programs supported by AMTI are built on a foundation of proven processes and procedures. Using skills acquired through extensive work experience and professional credentials like the Project Management Institute's Project Management Professional (PMP) certification, AMTI managers work closely with their Federal counterparts on every aspect of program execution. The use of automated systems - like the Satellite Navigation Automated Program Information Tool AMTI built for the FAA's Global Navigation Satellite Systems Program Office - provide comprehensive program management support, efficiently automating processes and streamlining business operations. To predict outcomes and control cost and schedule results, AMTI builds detailed Work Breakdown Structures (WBS) and uses Earned Value Management (EVM) to measure program technical, schedule and cost performance.

Let AMTI Make a Difference for Your Agency
