

 Service Offerings

Federal Aviation Administration

For the past 13 years, AMTI has supported the Global Navigation Satellite Systems (GNSS) Program Office's mission develop, integrate, implement, commission and sustain the FAA's Wide Area Augmentation System (WAAS) satellite navigation system program, and is supporting research and development efforts of the Local Area Augmentation System (LAAS). AMTI program management support tasks include project management, National Airspace implementation and integration, and earned value management (EVM). AMTI also provides systems and software engineering, safety assurance, facilities and contract management and financial planning, as well as engineering technical reviews and satellite acquisition. With AMTI's help, WAAS is now iCCM Level 3 in a number of process areas.

Department of Homeland Security

AMTI's information technology and security professionals developed the Security Activities Reporting System (SARS) to support the investigative efforts of U.S. Immigration and Customs Enforcement (ICE). Each day, SARS supports hundreds of Department of Homeland Security and ICE investigators, adjudicators, security, and management personnel by allowing them to access and manage more than 150,000 personnel security cases. SARS interfaces with other DHS systems improve information sharing and decrease redundancy.

Technology. Management. Consulting.

Advanced Management Technology Inc. (AMTI) provides a complete range of solutions for our Federal Government customers. Our service offerings fall into three major categories: information technology, program management, and technical consulting.

A Complete Range of Information Technology Solutions

AMTI's information technology credentials are grounded in our 15 years of support to our nation's aviation safety, scientific, and homeland and national defense communities. We believe that information technology must be focused on solving business problems and achieving consistent, measurable results. Our information technology offerings are grouped into five major areas:

- Enterprise software application development services
- Network services
- Information security services
- Multi-tier help desk services
- Internet and intranet services

Customer-Focused Program Management Support

In today's dynamic, rapidly changing environment, successfully managing a multi-million dollar Federal program requires experience, skill, and quality support. AMTI gives agency program managers a complete set of program management support services that meet the unique needs of their agency and mission. Our Project Management Institute (PMI) certified project managers bring best practices and proven processes to ensure program success.

Consulting Services Tailored to Your Agency Requirements

With a myriad of technology challenges and program reporting requirements, AMTI's Federal technology and program management customers look to us to help them address time-sensitive, highly specific requirements. Our cadre of IT and program management professionals brings domain-specific experience and subject matter expertise to bear, supporting requirements like Business Process Management (BPM), disaster recovery planning, risk management, and asset management.

Let AMTI Make a Difference for Your Agency
